

## READING

(12 Marks)

**Q1:** Read the text and answer the following questions:

The bright colours of birds, the call of monkeys and the hum of insects are common sights and sounds in a tropical rainforest. Rainforests grow near the Equator, where it is always warm and wet – the perfect habitat for plants and animals. In Papua New Guinea, scientists have just discovered a new rainforest. It has existed for many thousands of years at the top of a mountain. It has always been very difficult to reach. Even the people who live on the slopes of Mount Bosavi have rarely visited this hidden rainforest. It is very high up, at over 2,500 meters above sea level, and it is hidden inside the hole of a huge volcano. In 2009 CE, an international team of scientists visited Mount Bosavi and discovered an amazing world of plants and animals there.

1- What can you observe in a tropical rainforest?

.....

2- Where do rainforests grow?

.....

3- Why do rainforests considered a perfect habitat for plants and animals?
